1. SAFETY ESSENTIAL REQUIREMENTS

GENERAL CONSIDERATIONS

The **LARZEP** hydraulic cutters have been designed in accordance with our Quality Standards and under the control described by the ISO 9001 rules.

Bearing the above in mind, obviously the use of the cutter must be done as per the relevant instructions described in the manual. The user must be aware of the inherent risks when handling high pressure hydraulic devices, command properly the working operation and instruct accordingly the staff staying in the nearby area to the tool.

The tool is only designed for the operations described in this manual. No other uses are foreseen and therefore the manufacturer will not feel responsible for any damages caused by a wrong operation of the tool.

ORGANIZATIVE PRINCIPLES

The instructions guide must be always available at user’s reach.

Hydraulic equipment can be used with such little effort that it is often easy to forget the magnitudes of force involved. As a complement to the instruction manual, the user should be trained as far as the machine operation and the corresponding safety and technical rules are concerned, such as those about prevention of accidents and protection of environment. **The operators must wear protective clothes like helmet, glasses, gloves, boots and others.**

Helmet

Glasses

Gloves

Boots

- In order to prevent any personal or material damage, the operator should be duly trained in the working operation and apply the relevant safety actions.
- Whenever the tool is operated, the steps described in the paragraph “START UP” of this manual should be followed.
- Any modification on the tool or replacement of components affecting the general safety should be avoided without the previous authorisation by the manufacturer.
- Any repairing and maintaining operation, etc. should be done only by specialised staff and with original spare parts **LARZEP**.
- If it is used, replace the hydraulic hoses periodically even if at first sight that don’t show any damage or fault.
- Effect the suggested maintenance operations periodically as per this manual
- After operation, the tool should be clean and store fully retracted in a safe and clean place.

GENERAL INSTRUCTIONS FOR SAFETY

Check that both the tool and the accessories have not experienced any damage during transportation, handling or installation. Ensure that all the components of the hydraulic system can support the maximum pressure.

Before starting the operation, make sure that the user will work steady. Operate the tool in properly light powered areas.

Limit a maximum value of 80% of nominal capacity in continuous

Do not expose the tool to intense heat, such as when welding

- Effect the maintenance operations at no pressure and disconnected.
 - Do not overpass the nominal capacity of the machine. Use indicators and devices to be aware of the working pressure.
 - All commands should be operated by hand. Do not use any tools or levers for that purpose.
 - After operation, clean and store them in the box.
- **For CK0016, Hydraulic Chain Cutter with built-in pump.**
 - Make sure about the perfect cleaning of coupling and accessories. Dirty couplings are difficult to connect and might cause dust and other dirty materials to penetrate into the hydraulic circuit.
 - Take all the necessary protective actions, clothes, helmet, and goggles.

2. TECHNICAL CHARACTERISTICS

MODEL	CK0016
Push Capacity (700 kg/cm ²)	135 kN
Length	489 mm
Max. Gap between blades	20 mm
Head width	54 mm
Weight	5,8 kg

CK0016 CUTTING CAPACITY (ø max.)			
ø Chain mm	Strength by grades	ø Bar mm	Strength N/mm ²
19	28-43	19	700
14	60-80	15	1.000
		13	1.400
		11	1.600

3. START UP

1. Ensure the operator understands how the cutter operates.
2. Test the circuit by pumping oil into the tool, then opening the return valve to check the blade return. Check the tool at maximum pressure by working the piston against the limit of stroke and return the blade.
3. Insert the chain link or bar in the gap between blades (max. 19 mm).
4. Center the material to be cut in the gap and check the alignment with the tool.
5. Actuate the pump until the material is broken. Retract the blade by releasing the return valve in the pump.

4. MAINTENANCE

REPLACEMENT OF BLADES

FIXED BLADE:

1. Loosen the stud (16) and push the blade with a nail through the head hole and remove the damaged blade.
2. Insert a new blade and tighten the stud (16).

MOVABLE BLADE:

1. Remove the studs (16), on both sides and loosen the stud (28), to unscrew the body from the head.
2. Unscrew the screw (17), to get the blade free.
3. Mount a new blade and repeat steps 1 & 2 in reverse order to reinstall the piston assembly & body, controlling the position of the flat side of the piston.
4. The studs (16) work like the piston guide. Lock the screws by leaving an enough gap for the spring to operate.

REPLACEMENT OF SEALS

1. To disassemble the piston, unscrew the screw (18) and pull out the piston from the body to replace the seals (10, 22) and segment (61) with new ones. Do not use sharp edged tools.
2. The O-ring (12) and (23) and the washer (19) can also be changed along with seal and segment replacement.
3. To reassemble, repeat above steps in reverse order.

After operation, clean and store the tool in a box.

Perform maintenance operations with all pressure released.

Use always original spare parts LARZEP, S.A.

The spare parts of the tool are marked on the attached drawings with an asterisk.

Do not exceed equipment ratings. Use gauges or appropriate indicator devices to be aware of the working pressure.

5. WARRANTY

LARZEP, S.A. guarantees its products against all design and manufacturing defects for the durations of two years from the date of purchase. This guarantee does not include the ordinary wear of both metal and non-metal parts, abuse, using the equipment beyond its rated capacity and any wear or damage incurred as a result of using a hydraulic fluid which is not recommended by **LARZEP, S.A.**

Please note that if the equipment is disassembled or serviced by anyone other than an authorized service dealer or by **LARZEP, S.A.**, this guarantee is rendered null and void.

In the event of a warranty claim, return the equipment, to **LARZEP, S.A.** or the authorized dealer which sold you the hydraulic equipment, **LARZEP, S.A.** will repair or replace the faulty equipment, whichever is deemed most appropriate. **LARZEP, S.A.** shall not be held liable for any consequential damages or losses, which may occur as a result of faulty equipment.

6. DECLARATION OF CONFORMITY

DECLARACION DE CONFORMIDAD**E**

LARZEP, S.A.
Dirección: Avda. Urtiaga, 6
